

to airport

- laser in screen reads barcode on ticket
- message is sent to check-in desk to say you have arrived
- screens inform which check in desk you need
- screens display flight status through cctv footage
- interaction to show what passengers will be flying over

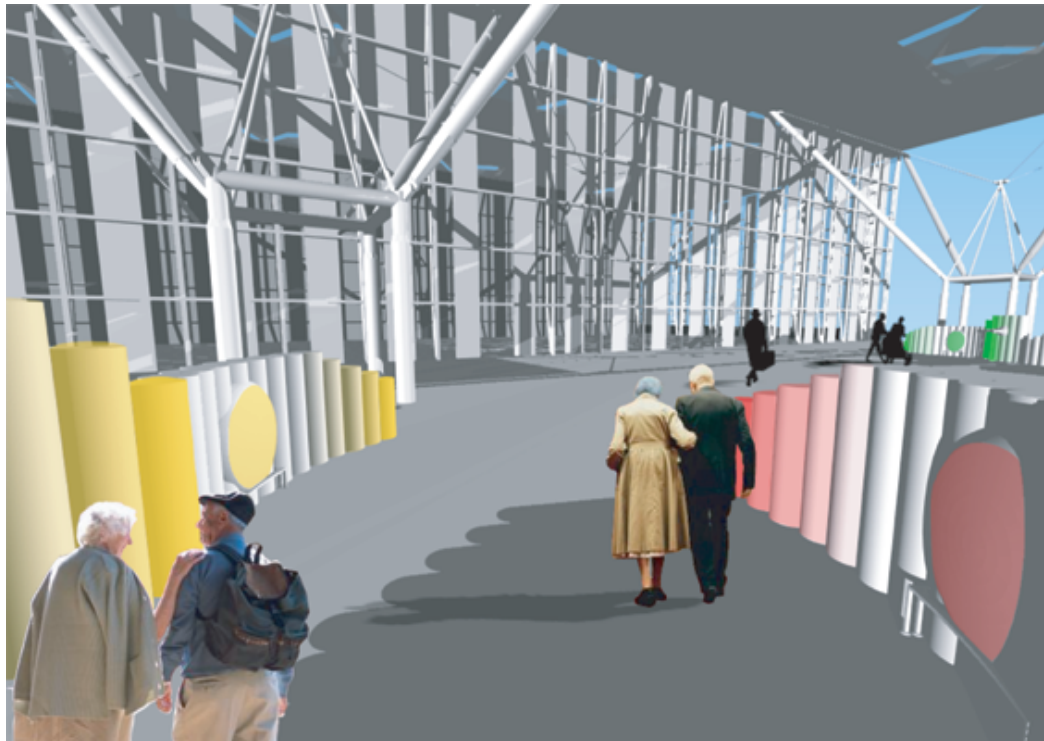

1 metre

from airport

- colour displays on unused screens show which transport terminus you are headed to
- screens display time table information for the bus, ferry and tube terminus
- screens have additional card swipe system to enable purchase of tickets

all pathways convene at the airport main concourse. at this interchange wall height screens display cctv footage from the runway. these screens cover areas that by law must not be seen like security and customs. however, they allow the passengers to see beyond the runways
